

Alpha NetSolutions

Unitrends

Business Continuity is a Top 3 Issue for CIOs. Recent Disasters such as Hurricane Katrina and 9/11 have brought this issue to the forefront of CIO's worries. With 43% of all companies who experience a disaster never reopening, and 29% closing within 2 years, these worries are well founded.

Rapid Recovery of Critical Business Systems

Recover critical data, operating systems, applications,
settings & passwords -- quickly and reliably.

Unitrends™ has an integrated approach to Business Systems Continuity that enables small and mid-sized businesses (SMB) to quickly recover the systems and data that keep them in business. Our Rapid Recovery System™ includes turnkey appliances and proprietary technology for rapid recovery from virtually any system to a desired point in time.

- Integrated, turnkey solution for data and system protection
- Provides disk-to-disk, high-speed data backup and recovery
- Off-site electronic vaulting and automated systems recovery
- Breakthrough price and performance for small to mid-size businesses
- Over 24 operating systems supported with a single user interface

Don't let a system crash or lost file cost you time and money. Get back-to-business quickly with Unitrends. Let Alpha NetSolutions and Unitrends show you how a Business Continuity Plan powered by Unitrends is your best investment for Disaster Recovery.

Alpha NetSolutions and Unitrends present a half day briefing on Business Continuity & Disaster Recovery. In this briefing, we will discuss:

- ✓ Define Business Continuity and Disaster Recovery
- ✓ Explain what's involved in a Business Continuity Assessment & putting together a DR Plan
- ✓ Show how a backup solution from Unitrends will dramatically simplify DR for your company
- ✓ See a demonstration of the Unitrends solution

Why get a Unitrends Rapid Recovery System?

“I can sleep at night”

---Sean Bastick, Systems Administrator & real Unitrends customer
