## Is Your Current Phone System Eating Up Your Profits And Causing You More Problems Than It's Worth?

**Our New Phone System Will Save You Thousands!**

### ***For Companies with 5-50 employees***

Do you cringe at the **\$200+ service call fees** every time you change some small thing on your phone system?

**Tired of being locked into** using your current phone system's overpriced equipment?

Do you want a more reliable phone system that you can **easily manage in-house** to avoid expensive, inconvenient service calls?

If so, I can help.

Let me explain...

We now offer a new breakthrough in phone system technology that will make expensive, complicated phone systems a thing of the past.

This new system, the AstraLinkRP (powered by Microsoft's Response Point) is giving the traditional phone systems a real run for their money. **Here's why...**

---

Alpha NetSolutions, Inc.  
508-797-0629

• 255 Main Street, Suite 115 • Marlborough, MA 01752  
• 633 Liberty Highway • Putnam, CT 06260

## The 8 Main Reasons Why So Many Small Businesses Have Traded In Their Current Phone System For Response Point

- 1. Drastically reduces your phone bill (up to 51%).** Response Point's new voice over IP technology integrates your data and voice networks to drastically reduce long distance and lease line charges you are currently paying. Our SIP trunks start around \$35/line/month, and include unlimited local calling, and discounted long distance.
- 2. Eliminates expensive technician visits.** Response Point's system was built so you could easily maintain it in-house with a few simple mouse clicks. No more waiting around for high-priced technicians to show up or paying high service call fees.
- 3. FREE voice mail, notification via email, auto attendant, call processing, and automatic call distribution.** If you've ever bought any other vendor's system, you know they charge a lot more for the extras already included standard in this system.
- 4. The Response Point System is 25%-85% LESS expensive than other well-known phone systems** such as Avaya, Nortel, and Cisco to name a few. Price for a base RP system with 3 phones starts around \$2400. Phones run \$100-\$300. You can even finance this with Microsoft Finance – Monthly fees start at as little as \$12/phone/month!!!
- 5. Bypass the number pad using innovative voice recognition technology.** With Response Point phone system software, you simply tell your phone what to do—and all it takes is a push of the blue button. The software's speech recognition technology is top quality, thanks to Microsoft's long-term investment in research and development.
- 6. Automated Receptionist** routes calls and answers common customer questions. Clients can ask for your fax number, or directions to your office, in plain English, and get an answer from the Automated Receptionist.
- 7. Increase employee productivity with enhanced mobility.** Call forwarding, integration with Outlook, and more.
- 8. We offer a 100% MONEY BACK GUARANTEE.** If you are not happy with your new phone system, we will come back out, remove the system we installed, set your old system up, and refund your entire purchase price for up to ninety days. That's how confident we are that you'll LOVE this system.

### Example Cost for a Response Point system for a company with 10 phones & 5 lines:

Base RP System -	\$2400
+ 7 Phones -	\$1050
QOS Appliance -	\$800
Installation -	\$2000
<b>INITIAL COST -</b>	<b>\$6,250.00</b>
OR MS Finance, 3 yrs -	\$229/mo.
<i>(no payments for 6 months!)</i>	
Est. Costs, 5 lines -	\$225/mo.
AlphaCare Support -	\$70/mo.

Wow!

## Free Phone Audit Shows you how to save \$5,000 over the next 3 Years

If your company is in Southern New England, and if you currently have an old PBX legacy system with between 10 and 40 phones and at least 5 traditional phone lines, sign up to receive a **Free Phone Audit** and I'll personally come out to your office and do a complete communications analysis for your company. **At the end of our audit, we'll summarize our findings and show you:**

- Exactly how much money you could save by trashing your current system and upgrading to our next generation voice over IP solution.
- How you can avoid common phone problems like voice mail limitations, dropped or missed calls, and voice mail jail.
- Overlooked ways to improve customer service without overloading your front desk.

### Our "No Strings Attached" Promise

I also want to be very clear that there are no expectations on our part for you to do or buy anything when you sign up for a Free Phone Audit.

**So go ahead and put us to the challenge  
right now while you're thinking about it.**

Best Regards,
